ABOUT ME

Machine Learning Engineer and Python Developer with hands-on experience in building AI solutions, predictive models, data analysis pipelines, and interactive web applications. Skilled in Python, Scikit-learn, Pandas, NumPy, and Streamlit, with a passion for delivering high-quality AI solutions, automation tools, and business-focused applications for clients worldwide.

EDUCATION

NUTECH UNIVERSITY 2024 - Now
BS in Artificial Intelligence

PAEC MODEL COLLEGE 2022 - 2024
Inter in Computer science

IMCG NILORE COLLEGE 2020 - 2022
Matric in Computer science

SKILL

- Machine learning
- AI Development
- Exploratory Data Analysis
- Model evaluation
- Python programming
- Git & GitHub
- Web development

WORK EXPERIENCE

CODEALPHA SEP 2025 - OCT 2025
Machine Learning Intern

- Developed machine learning solutions using Python and Scikit-learn.
- Performed data cleaning, preprocessing, and feature engineering.
- Evaluated and optimized predictive models.
- Worked on real-world machine learning projects.
- Successfully completed Machine Learning Internship Program.

FREELANCE AI & PYTHON DEVELOPER 2025 - PRESENT
Self-Employed

- Developed AI-powered web applications.
- Built data analysis and visualization dashboards.
- Created responsive business websites for clients.
- Implemented machine learning models for classification tasks.

PROJECTS

- Roman Urdu Hate Speech Detection System
- Handwritten digit recognizer
- Tutorconnect-Paksitann tasks.
- Fake News Detection
- Customer churn prediction
- Diabetes prediction
- Furniture website
- My Portfolio website

REFERENCE

Will be furnished on demand.
